

Visually a cityscape is an artistic representation, such as a painting, drawing, print or photograph, of the physical aspects of a city or urban area. Majestic stone and mirrored reflection create images of the big city in our new line of mosaics. The introduction of a 2x8" reflective and shiny glass field, opposite the rough texture of quartzite, this gives a modern influence to your next design project. The result is a refine and finished look that is a distinctive combination of subtle neutral colors and sleek textures.

Thickness 5/16", sheet size: 11.8x11.8"
Material: Glass / Stone

LAYERS WHITE

Variation in color, shade, finish, hardness, strength and slip resistance is inherent in Natural stone products. White marbles contain naturally occurring deposits of iron which may lead to discoloration of marble and turning it yellow-rust or gray if used in wet areas. These are natural characteristics of the stone and that is why it cannot be considered as a defect in the product. We are in no way responsible for discoloration of the natural stones.
